

2026 North Carolina High School Football Report

Week 7 — October 1, 2026

Work in progress. This report is in active development. Ratings and projections will change as the system is refined, and some sections are not yet complete.

Ratings basis: 2272 2026 results, seeded with 2025 Home field: +1.1 pts Generated October 02, 2026

Programs That Ended Their Season

- **First Flight** (Kill Devil Hills) stopped on September 18 at 0-4: not enough players to continue the varsity season safely. The Outer Banks Voice
- **Thomas Jefferson Classical Academy** (Mooresboro) stopped on September 23 at 1-3: a large number of serious injuries and too few players remaining. WBTV
- **West Bladen** (Bladenboro) stopped on September 24 at 0-5: not enough healthy players to take the field safely. WITN

Under NCHSAA rules, a school that stops mid-season forfeits each conference game it has left, and those count as wins for the opponents. Its other remaining games are no contest and count for no one.

Leaders

Scoring tables are as played. Adjusted tables account for the opponent, so ten points conceded to a strong offense outranks a shutout of a weak one — the two disagree on purpose.

Playoff Picture

Projected playoffs → every round of every bracket, with projected scores.

Projected champions: 8A **Hough** · 7A **Weddington** · 6A **Roberson** · 5A **Hickory** · 4A **Tuscola** · 3A **Shelby**
· 2A **Tarboro** · 1A **Northside**

The RPI bubble: the teams whose chance of making the playoffs is between 15% and 85%, with the last teams safely in and the first teams out on either edge, listed by that chance. **In** is 85% or better, **Out** below 15%.

24 of 32 8A teams make the field. Teams are listed by their chance of finishing in it, from the season simulation, which plays out the games each team has left; the dashed line is where the field is projected to be cut, and the bracket is drawn from the teams above it. RPI today and Rank today are the official NCHSAA table as it stands: the top 24 would make it if the season ended now. Projected RPI is the average final RPI across the simulated seasons. The order goes by playoff chance, which also counts how far a team's finish could swing either way, so two teams close in projected RPI can sit a place or two apart.

48 of 56 3A teams make the field. Teams are listed by their chance of finishing in it, from the season simulation, which plays out the games each team has left; the dashed line is where the field is projected to be cut, and the bracket is drawn from the teams above it. RPI today and Rank today are the official NCHSAA table as it stands: the top 48 would make it if the season ended now. Projected RPI is the average final RPI across the simulated seasons. The order goes by playoff chance, which also counts how far a team's finish could swing either way, so two teams close in projected RPI can sit a place or two apart.

2A bubble — 48 of 46 make the field

All 46 2A teams make the 48-team field, so there is no bubble in 2A.

1A bubble — 48 of 25 make the field

All 25 1A teams make the 48-team field, so there is no bubble in 1A.

Winningest Coaches

North Carolina head-coaching records: every game in our archive for the seasons a coach is credited with, from HSFHA, the NCHSAA, NCHSFootball and MaxPreps, with a published stint filling a season no source names. Records outside North Carolina are HSFHA's. Still being completed: for 1980-1999 many seasons have no coach on record anywhere yet.

Season Projection

120 simulated seasons. Results through week 6 are taken as they stand; every week after that is played out in full, with ratings refit after each one. Outcomes are sampled rather than awarded to the favorite, so upsets happen at the rate the model believes they happen. The mean rating comes back close to where the season has already put each team — a simulation learns nothing new about games nobody has played — so the 10th–90th band, not the mean, is the forecast, and it widens the further out the projection runs.

Power ratings are opponent-adjusted and fitted separately by classification, so a team is measured against the level it actually plays. Confidence figures are probabilities, not guarantees — a 70% pick is expected to lose roughly three times in ten. Games shown in **red** are near coin-flips.
